

Keri Sicard

Patent Attorney

With an emphasis on patent law, Keri focuses on the preparation and prosecution of both US and foreign patent applications in a number of technical fields including the mechanical arts, medical devices, electro-mechanical systems, electronics and computer software. She also assists in patentability and infringement searches and the preparation of patentability analysis and patent clearance opinions as well as trademark availability searching and analysis.

“Don’t worry, we’re not just lawyers. We’re engineers too, and we carefully review details of your application with precision and accuracy to ensure it is properly prepared and prosecuted. We have specific procedures in place to ensure we can handle all clients and all matters with individualized care and attention.”
